## DETAILED ACTION

### *Specification*

The abstract of the disclosure is objected to because of the use of phrases, which can be implied, such as "is provided", which should be avoided. Correction is required. See MPEP § 608.01(b).

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over (British Patent No. 2 347 124) in view of Hirase (U.S. Patent No. 6,405,962).

With respect to Claims 1-8, British '124, teaches a seat belt retractor comprising a spool 4; a bearing 69 a clutch mechanism; a pretensioner; a gas generator; a plurality of serial driving members a path for guiding said driving members; first and second rotational members. It is unclear whether British '124 includes a light alloy spool. However, Hirase teaches the use of a spool which *is formed of light material such as synthetic resin, a light alloy or the like*. It would have been obvious to one of ordinary skill in the art to provide British '124 with a spool made of a light alloy, as taught by Hirase, for the purpose of minimizing the weight of the retractor.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
